

NEXTMap USA Coastal Data

Intermap Technologies in conjunction with Aero-Metric have received a subscription contract from the National Oceanic and Atmospheric Administration (NOAA) for Intermap NEXTMap USA coastal data for a NOAA Coastal Services Center (NOAA CSC) managed programme. Under the contract Intermap will provide NOAA with imagery and elevation map data for regions in Florida, Alabama, Louisiana and Mississippi. This is the first phase of a planned multi-year programme anticipated to include the purchase of similar data for the entire coastline of the continental United States. The Intermap portion of this Phase-I contract is valued at approximately \$ 690,000 (US\$ 522,000); work commenced in September 2004 and is expected to be completed in May 2005. The data for Mississippi and Louisiana has been collected and is undergoing processing for delivery. The coastal data for Florida and Alabama will be collected this autumn with data deliveries continuing throughout the duration of the contract.
