

# Novacavi Presents New ROV Dynamic Cables

Novacavi is launching a matt PUR finished version of ROV dynamic cables to improve operational efficiency and manoeuvrability both in water and on deck. Key features are a sliding and less sticky performance especially when on winches out of the water. This customised extensive range of matt PUR sheathed cables is conceived to improve handling and avoid clinginess in use while guaranteeing same moulding technical compatibility and steady abrasion resistance characteristics of the glossy sheathed cable version.

Engineered and manufactured for reliability all our ROV custom cables focus on addressing growing needs in ROV technology development.

Novacavi's technical and product team skilfully put together expertise in choosing right materials, engineering versatility and production flexibility to supply custom cost-effective creative and reliable solutions necessary to make our customers successful in their operations.

Novacavi will feature examples of realised custom projects at [Oceanology International](#), held from 13-15 March in London.

For more details see [here](#).
