The Oceans ’06 MTS/IEEE-Boston Conference and Exhibition will be held in Boston Massachusetts from September 18-21, 2006.

The OCEANS ’06 MTE/IEEE-Boston technical program will continue to emphasize the traditional core areas of marine science and technology development. Researchers from academia, industry, and government are encouraged to submit their recent work on various topics. In addition, the Boston conference plans to highlight several ‘hot topic areas of high current interest to the members of the MTS/IEEE research community. For more information on the required topics, please visit the conference website.

Revised abstracts should be contributed before 31 March, 2006.

Abstract submissions will be accepted on the conference website.

For the first time in several years, OCEANS 06 MTS/IEEE-Boston will offer the Exhibitor Product Showcase for registered exhibitors to make short presentations in a technical session format. A limited number of spaces will be available for these presentations, with priority given to new developments and hot technologies. The Exhibitor Product track is distinguished from the main technical program in that presenters will not be required to submit archival papers. Abstract submission will be via e-mail and reviews will be conducted by a separate panel of experts. Details will be posted on the conference web site.
