

Octopus Update & Special Offer

The Octopus 461 Mosaicing Toolkit and 361 Sub Bottom Toolkit, the original Windows geophysical processing solutions, have been updated and upgraded with Version 5. With added support for Klein 2000, 5000 and 3000 formats, new multi-format sidescan quick viewer and many other improvements, the Octopus 461 Mosaicing Toolkit is a high-resolution mosaicking solution for all formats of sidescan sonar data. The updated Octopus 361 Sub Bottom Toolkit has improved digital filters and is complemented by an all-new SEG Y utilities application, including facilities for extraction of navigation data from SEG Y files.
