

ODIM Awarded Contract for Seabed Handling Systems

ODIM has been awarded a contract worth NOK32 million (US\$4.60 million) by emgs for delivery of two automated handling systems for Seabed Logging. The systems are due to be delivered in December 2008.

“We are very satisfied with emgs’ choice of ODIM as their supplier of handling systems within Seabed Logging. This confirms ODIM’s position as a supplier of automated handling systems within this exciting field as well,” says Idar Hatløy, Vice President “Seismic” at ODIM. ODIM has earlier delivered handling systems to emgs.
