

# OmniSTAR<sup>™</sup>'s Newest HP Capable Receiver: the 8400HP

OmniSTAR announces its latest 8400HP GPS receiver. After start-up this receiver works instantly in DGPS VBS mode and switches to HP once an accuracy of 30 cm has been reached. The 8400HP has internal batteries that last up to 10 hours, making the receiver highly suitable for the GIS market. As an option there is 32 MB internal memory available for storage of either position or raw measurements. Operation in RTK mode is also optional.
