

Operations & Maintenance for Sidescan Sonar Seminar

L-3 Klein Associates is organising a Sidescan Sonar Operations and Maintenance Training Seminar from 29 to 31 October 2013 at the company's facility in Salem, NH, USA. This seminar is geared to operators as well as to managers who want a better understanding of sidescan sonar techniques. The course is open to any user of sidescan sonar regardless of brand, experience or occupation.

The training will include 2 days of classroom instruction and 1 day of on-the-water training. Lunch will be provided daily.

Topics covered will include:

- Basic Sonar Principles
- Types of Side Scan Sonar
- Bathymetry Overview
- Sonar Design
- Basics of Underwater Acoustics
- Interpretation of Side Scan Sonar Records
- Target Detection
- Field Operations
- Specialty Applications
- Troubleshooting
- Maintenance
