

OSI Completes Seabed Characterization Projects

Ocean Specialists Inc (OSI), has announced the completion of a series of seabed characterization projects that involved geophysical and geotechnical surveys at selected locations in the Gulf of Mexico and Western Atlantic. OSI incorporated the survey resources of its sister company, CSA Ocean Sciences Inc (CSAOS), mobilizing a total of three separate missions under rapid planning and mobilization conditions. The Operations involved a 150ft DP-1 class vessel based in the Gulf of Mexico, as well as electronic seabed classification with the 8.5m purpose-built CSA Surveyor in the Atlantic locations.
