

OSIL acquire UK rights for Codar Ocean Sensors' SeaSonde

OSIL has announced their partnership with Codar Ocean Sensors. OSIL have become Codar's UK representative and will be primarily selling the SeaSonde, Codar's HF radar system. OSIL will work closely with the new Codar Europe office, based in Madrid, who will provide technical support to OSIL as well as Codar's other European representatives.

Codar's SeaSonde HF radar system is a non-contact, surface current and wave measurement system that accounts for over 80% of the HF radar systems in use in the world today. The SeaSonde combines state of the art technology with reliability and convenience, providing its customers with the only solution for their ocean observation needs. The SeaSonde can offer ranges of up to 200km.
