

# Over 30 Speakers to Present at ADCPs in Action

Teledyne RD Instruments announced that over 30 speakers will be presenting their Acoustic Doppler Current Profiler (ADCP) and Doppler Velocity Log (DVL) research and field work at the company's biennial ADCPs in Action (AiA) Users' Conference, scheduled to take place in San Diego, CA, USA, from 29 September to 5 October 2013.

The [users' conference](#) is designed to bring the marine community together to share their ADCP, CTD and DVL experiences. This three-day event boasts [4 concurrent tracks comprised of over 30 presentations](#) given by experts from around the globe, as well as 18 product/software training sessions, and a wide array of Teledyne RDI and co-sponsor dockside and on-water demonstrations. Other event highlights include one-on-one meetings with the field service team, data analysis clinics, Lightning Rounds filled with field-proven tips, customer forums, a growing list of poster papers, and 22 event co-sponsors displaying their latest products, software, and technology designed to assist users.

This event also includes numerous social events designed to encourage networking and a free flowing exchange of ideas and information.

This year, AiA falls at the tail end of Oceans 2013, allowing many visitors to combine their travel arrangements in order to attend both events.
