

PEMEX Extends Offshore Geophysical and Geotechnical Campaign

Mexico's national oil company, PEMEX, has awarded a further extension to Fugro's contract to support its exploration drilling activities in the Bay of Campeche. The contract extension is valued at approximately USD20 million and the workscope includes geophysical and geotechnical field operations, laboratory testing and geoconsulting activities.

The field programme commenced in December 2015 from the ultra-deepwater geotechnical and well services vessel *Fugro Synergy*, while the geoconsulting programme will continue through 2016.
