

Possible Delays in Delivery Hydro International and Business Guide

The sudden closure of the borders between the United Kingdom and parts of continental Europe to stop spreading the new variant of the Covid-19 virus is causing delay in delivery of mail. Further restrictions at the borders, that might occur in the case of a no-deal Brexit by the end of the year, may cause even more delay in mail delivery from the continent. If you haven't received *Hydro International* and *Hydro International **Business Guide*** till date, please be aware that the delivery of the magazines could suffer from aforementioned closure and other restrictions. This delay can occur in the United Kingdom, but also in other countries, where airports in the UK are being used as hub for further transport. We ask for your understanding.
