Presenting GIS Experiences

The 2010 ESRI User Conference is to be held from 12th to 16th July 2010 in San Diego (CA, USA). GIS users are encouraged to share their best practices, successes or application by submitting an abstract of their project online, not later than 16th October 2009.

The organisation is to contact the authors by March 2010 about the status of their [abstract submission](#).

Also business partners can submit a paper but the main presenter should be a client.

Presenting during the conference adds to the delegate's knowledge and provides the opportunity for networking and discussion.
