

# Product News: MATS LT, Modem for Underwater Acoustic Communication and Positioning

MATS LT is a cost-effective micro modem dedicated for underwater acoustic communication and positioning. Its small size, weight and reduced power consumption make MATS LT an ideal solution for compact AUVs. Highly efficient, the micro underwater acoustic modem allows a communication range up to 3,500 meters. MATS LT is available in two versions: cased (water resistant up to 500m) or uncased ready for integration in your own solution.
