# Remote HDB Chart Masters

IIC Technologies has been selected by the UK Hydrographic Office to provide Hydrographic Database (HDB) services. IIC will help populate the UKHO's hydrographic database using secure, remote connection technology.

From this seamless, harmonised database, IIC will then remotely produce HDB paper chart masters which are then used by the UKHO to produce paper charts. The program focuses on two of IIC's core capabilities: CARIS HPD and Citrix remote connectivity expertise. The two year contract has an option to extend for a further three years.
