

# Remotevision Wins Dame Award for Simrad and B&G

B&G RemoteVision from Simrad was announced joint winner of the Marine Electronics category of the 2004 DAME Awards. Held every year by the organisers of METS, the Amsterdam RAI, the awards recognise excellence and innovation in marine equipment across the industry.

Simrad launched RemoteVision at Southampton Boat Show 2004 and it is already installed on several high-profile yachts, including Ellen MacArthur's B&Q and Mike Golding's Ecover. Both Ellen and Mike assisted in the development of RemoteVision helping B&G to build a truly innovative device for serious yachtsmen.
