

# RESON User Conference 2010

Multibeam manufacturer RESON organises a user conference from 18th to 20th October 2010 in St Petersburg, FL, USA. Topics are meant to be interesting for anybody interested in underwater acoustics. A dedicated website with registration is launched.

The 2010 user conference covers:

- Advanced Hydrographic applications
- Latest developed Dredging software
- Defense and security sessions with focus on underwater threats
- Oil and gas applications, pipeline surveys, oil recovery and other hot topics
- The knowledge level will be quite high and specific sessions has been arranged where the latest R&D with in Multibeam sonar applications will be presented

The website also unveils the full programme with seminars and demonstrations. Registration can be arranged online.
