Safe Software FME Worldwide User Conference

Safe Software will host its first FME Worldwide User Conference on September 21-22 in Vancouver (Canada). The conference will provide GIS professionals, database managers and FME users with an overview of FME's latest capability, and will also offer technical sessions that address key data transformation challenges. The conference agenda includes presentations by companies in key market sectors, as well as a poster gallery and several presentations that are designed to be entertaining as well as informative. Optional pre-conference sessions offered on September 19-20 will provide participants an opportunity to attending a comprehensive two-day FME training course, or a half-day introductory seminar on SpatialDirectÂ® - Safe Software's FME-based solution for distributing spatial data in multiple formats via the Internet.

The conference agenda and registration information are available at [the FME User Conference website](.).
