Second Mexican Hydrography Convention Approaching

The Mexican General Office of Oceanography, Hydrography and Meteorology is organising the Second Mexican Hydrography Convention, to be held from 8-10 December 2014 in Manzanillo, Colima, Mexico. The theme is “Hydrography – More than Nautical Charts™.

The focus is to be on 'Hydrography, pillar of the Mexican maritime development' which will be addressed, besides the weather and sea hydrography issues. The purpose is to strengthen friendship links and integrate the maritime hydrographic and meteorological community from government, private and academic sectors as well as hydrographic offices of countries in Central America. Hence, the event is taking place from 10 to 13 December 2014, in parallel with the fifteenth session of the Mesoamerican and Caribbean Hydrographic Commission Sea (will be held in the same city). The member states of the conference are to provide technical information that will increase the Mexican river convention skills to do more than just charts. There will be a highly relevant participation in all activities taking place in accordance with the preliminary agenda, including exposure to posters with achievements in the past year, in streets and avenues of Manzanillo, Colima. More information is available on the conference website (in Spanish only).
