

# Seminar on Sea Level Network

SHOM, which manages the network of reference tidal observations (REFMAR), is organising its first conference on this subject. Entitled 'REFMAR days', the event will be held from 17 to 21 June 2013, and will bring together data producers and users of water heights. Many subjects are to be discussed, including the changing sea level and warning and risk prevention by submersion systems.

[The conference](#) is to take place at the Branche Geosciences geography, meteorology, oceanography Hydro-Saint-Mandé, at the headquarters of the IGN and Météo-France and the Paris branch of the SHOM.
