

# SES Took Delivery of its 4th TrackLink System

Survey Equipment Services (SES) Inc., Houston, Texas, has recently taken delivery of its fourth TrackLink 1500HA USBL positioning system from LinkQuest Inc. The purchase has been made by SES to expand its existing pool of TrackLink 1500 systems. Based on the advanced Broadband Acoustic Spread Spectrum Technology and modern DSP technology, the TrackLink systems offer highly accurate, robust and cost-effective USBL positioning solutions to meet worldwide demand. These systems are compact, light weight and intuitive to use which minimizes the time leasing customers need to spend on installing and operating a USBL tracking system.
