SevenCs to Launch New ECDIS Kernel

SevenCs has announced the next-generation software development kit (SDK) for maritime applications, called Nautilus ECDIS Kernel.

'Nautilus' combines the longest SDK experience in the market with current technology. Some of the product highlights are:

- S-100 compliant
- peak performance (hardware accelerated rendering)
- fast, easy and ready-to-use chart import
- full military chart support
- C++ and C# programming interface
