

# Simonette Lentze-Muller VP of Operations at Zupt

Zupt has welcomed Simonette Lentze-Muller as their VP of Offshore Operations. Within this role Simonette will be responsible for the oversight of all of Zupt's offshore operations including data integrity, operational management and personnel oversight.

Simonette comes to Zupt from Heerema Marine Contractors, where she was employed as a senior specialist in Engineering Subsea Services. Simonette has a background in mathematics and vast experience in offshore marine construction surveys, positioning and underwater acoustics. Her expansive knowledge on underwater acoustics reaches further than the Oil and Gas industry as her earlier career focused on developing algorithms for sonar applications for the Dutch Navy at TNO. Simonette was also the author of the paper on 'Noise mitigation during pile-driving', which won the 2014 IPLOCA Environmental

award sponsored by Shell.

Simonette adds to have joined Zupt, LLC because it is a highly technical company delivering innovative methods to the world of offshore construction. She hopes to bring a lot of experience from a client's side in the offshore positioning world, as well as the power to further expand on our inertial methodology. "I like complex work and I like to develop new methods and use them in the field. Specifically, I would like to use my previous experience to help discover new applications that combine underwater acoustic and inertial methods. I will do my best to support Zupt, LLC in its ambition to be the most innovative company in the survey business."
