

# Spanish contract for RESON

RESON has recently been awarded a contract for supply and installation of a SeaBat 8160 deep water multibeam system to Ecometria, a private Spanish survey company based on the Canary Islands. The system has been deployed on board the survey vessel *R/V E. EVA* owned and operated by Ecometria. Ecometria intends to use the SeaBat system within their following main areas of research: Cartography; Environmental research; Vulcanology and Oceanography.
