

# Sub-Atlantic ROV Contract

Oceanteam 2000 Limited has placed a substantial order with Sub-Atlantic Limited, for five ROV-systems. The range of systems purchased includes the Comanche system, one of the latest developments by Sub-Atlantic, utilising proven technology already in use on its Mohican ROV. This system will be fitted with Orion manipulators from Schilling Robotics Inc., an Alliance partner with Sub-Atlantic Limited. These industry-recognised manipulators will allow Oceanteam 2000 to undertake projects requiring a greater degree of intervention than is currently possible with other electric ROVs commonly in use. The full range of systems ordered by Oceanteam 2000 includes the Mohawk, Super Mohawk and Comanche. The first system is to be delivered in early December.
