

Subserv Pro and ORCA Offshore Join Atlas Professionals

Through the collaboration of its subsidiaries, Atlas Professionals has been able to grow and strengthen its presence within the Energy and Marine industries. Atlas Professionals has completed the acquisition of a 100% interest in Subserv Pro (SSP) and its subsidiary ORCA Offshore (ORCA). This acquisition will add further scope and options for both of Atlas's™ clients and personnel.

As of the end of August, SSP's and ORCA's staff shall remain unchanged, with their teams operating in the same location in Banbury. However, Marcus and Operations Director Celia Chandler will leave the company and hand over management to Andrew Blears, director of Atlas, with daily operations managed by Rob Pattenden, Jason Timms and Will Taylor-Walsh.

Niche Markets of ROV and Renewable Energy

The office will expand Atlas' UK network, bringing together two agencies in the niche markets of ROV, Diving, Inspection and Renewable Energy. This office will be collaborating with Atlas' Lowestoft branch, where all of Atlas' ROV services have been transferred.

When Atlas began proceedings of the acquisition, both companies found that they shared the same core values; to invest and help their professionals grow within their careers. Atlas shall remain committed to continuing business as before, offering quality and maintaining a personal approach in all that we do.
