

Subserv Pro Welcomes Atlas Professionals as Minority Shareholder

As Subserv Pro enters its tenth year, the company has agreed an initial 25% equity investment by Atlas Services Group Energy Limited. Control of the companies (Subserv Pro and its subsidiary ORCA Offshore) will not change; however, the agreement will see Marcel Burghouwt, managing director of Atlas Professionals, take up a non-executive position on the board of directors.

Marcus Chandler, managing director of Subserv Pro, comments on the relationship that while Subserv Pro remains an autonomous business it now has the benefit of the backing, resources and global reach of Atlas Professionals. He adds that the 30-strong team within Subserv Pro and ORCA are very reassured by this alliance, with Atlas being such a respected international operator in the field.

Subserv Pro sources qualified personnel on a worldwide basis for clients operating in oil and gas offshore, subsea telecoms, power and renewables. It also provides crew management services to fleet operators through its subsidiary company, ORCA Offshore.
