

Survey And Positioning Contract for Utec Survey

UTEC Survey Asia (Singapore) has received a contract award from Malaysia Marine and Heavy Engineering (MMHE) to supply survey and positioning services in Turkmenistan. UTEC Survey will support the MMHE-Technip JV installation of a 7,000mT Gravity Based Structure (GBS) and topside floatover. The work is scheduled to take place in fourth quarter 2010.

In addition to providing positioning services for the structures, UTEC will deploy precise motion and environmental sensors in order to provide real-time monitoring during the installation. Sean Fowler, Managing Director of UTEC Survey Asia, commented that this contract represents a key milestone in UTEC Survey's service record. The team members have worked closely with MMHE-Technip in developing a robust technical solution which fits their critical path installation schedule.
