

# Survey and Positioning Contract

DOF Subsea UK has entered into a long term agreement with Heerema Marine Contractors Nederland BV (HMC) to provide survey and positioning services onboard its deepwater construction vessels. The agreement covers a worldwide scope, but the current focus is on projects which are already underway in the Gulf of Mexico and West Africa.

Commenting on the contract award, Garry Millard, DOF Subsea UK's Managing Director said, "We're delighted to be awarded with this agreement. It confirms the trust and commitment that has developed between both companies over the last five years and gives us the opportunity to further demonstrate our ability to deliver superior world class services in complex and challenging environments."

DOF Subsea currently owns the largest and most modern fleet of subsea construction vessels in the world. Including vessels and ROVs that are under construction as part of an extensive new build programme, the company owns 25 offshore vessels, 31 ROV systems, 1 AUV system, and diving spreads.
