

Swathe Services to Distribute AUV-S

Advanced Undersea Vehicles and Systems (AUV-S) LLC, based in Houston, Texas, USA, has appointed Swathe Services as exclusive sales distributor for the UK and Europe. AUV-S provides the offshore industry with safe and reliable autonomous products including the highly versatile multi-purpose unmanned surface vessel (MUSV).

Swathe Services has recognised that the future of the survey industry lies amongst products that are able to produce high-quality, cost-effective surveys whilst increasing safety, which is precisely what can be seen in the products that AUV-S manufacture. In addition to this the MUSV complements Swathe Services' existing range of products from manufacturers such as Applanix, R2SONIC, Tritech and Valeport.
