

System 5900 Advanced Multi-function Sonar Platform on Show

L-3 Klein, USA, invites interested professionals to visit the Sea-Air-Space 2013 Show being held from 8 to 10 April 2013 at the Gaylord National Resort and Convention Center in National Harbor, MD. L-3 Klein will be in Booth 2437 to answer any questions concerning the full line of side scan and multibeam sonar products. On display will be the Klein S5900 Side Scan Sonar which is now in rate production.

The MIL/COTS S5900 Side Scan Sonar represents Klein's advanced multi-function sonar platform and includes the features: high-resolution multi-beam side scan sonar, swath bathymetry sonar, gap filler sonar, and integrated tow body sensor and subsystems. The sonar employs advanced signal processing techniques and superior acoustic design to improve overall along track target resolution.

The S5900 high-speed, high-resolution, side scan sonar performance capabilities, when coupled with the gap filler sonar for fast coverage rates makes the system an choice for MLO detection, classification, Q-Route surveys and rapid area reconnaissance.
