

Tahiti Project Completed

C & C Technologies has recently completed an AUV hazard survey in Green Canyon 596, 640 and 641 for the ChevronTexaco Tahiti project. An AUV aboard the R/V Supporter collected high-resolution multibeam bathymetry, side-scan sonar and sub-bottom profiler data in water depths ranging from 1,000 to 1,300 metres. During the project the AUV collected over 1,000 kilometres of survey line data that was analysed by onboard route engineers for QA/QC measures.
