

Teledyne Marine: Call for Speakers

The Teledyne Marine Technology Workshop (TMTW) will be hosted in San Diego, CA, USA from 4-7 October 2015. One component of the users'™ conference will be presentations given by users utilising Teledyne products. Customers are encouraged to submit abstracts on the following broad topic areas: offshore energy; oceanographic research/hydrography; defence/security; and civil engineering/river monitoring. Abstracts deadline is 30 May 2015.

Building upon the Teledyne RD Instruments' ADCPs in Action Users' Conferences and Teledyne Reson's Technology Workshops, the Teledyne Marine companies will join forces to host an expanded users' conference in which users from around the globe will converge to explore, learn, and share their vital experience on a broad range of technologies. Detailed information is available through the [Teledyne Marine Technology Workshop website](#).
