

# Teledyne Marine's Innovation Preview

The Teledyne Marine companies will be hosting a Product Innovation Preview on Monday, April 4th, one day before the conference officially begins. The companies have scheduled product launches for this conference. The companies presenting include: Teledyne Odom, Teledyne RDI, Teledyne TSS, Teledyne Benthos, Teledyne Gavia, and Teledyne Webb Research.

Ocean Business can be extremely busy with vendors to see, as well as classroom, dockside and at sea training sessions, which made Teledyne Marine decide to take advantage of presenting and meeting with interested professionals before the madness of the conference begins. Attend all or part of this afternoon session to gain an in depth understanding of our latest and greatest product offerings and how to put them to work.

This event will be wrapped up with a cocktail hour and the opportunity to meet with the Teledyne Marine companies and fellow professionals before heading off to the Ocean Business Ice Breaker downtown.

Ocean Business delegates who like to attend, please RSVP to Margo Newcombe at [atmnewcombe@teledyne.com](mailto:atmnewcombe@teledyne.com).
