

# Teledyne Marine Technology Workshop: Call for Speakers

Teledyne Marine has announced a call for speakers for its joint Teledyne Marine Technology Workshop (TMTW) to be hosted in San Diego, CA, USA, from 15-18 October 2017. Building upon the success of the group's 2015 inaugural event, Teledyne Marine's 23 brands will once again join forces to host an expanded users' conference in which users from around the globe will converge to explore, learn and share their experience on a broad range of applications and technologies.

A key component of this users' conference is presentations given by customers sharing their field and laboratory experience utilising Teledyne products. The three-day workshop will include four concurrent morning tracks dedicated to the following broad topic areas: Offshore Energy; Oceanographic Research; Hydrography; Defence/Security;

Aquaculture/Fisheries; and Civil Engineering/River Monitoring.

Teledyne customers are encouraged to submit an abstract sharing their experience using Teledyne products in any of these applications. Abstracts can be submitted for speaking slots or poster paper presentations. All accepted speakers will receive free admission to the event; poster paper presenters will receive a USD100 discount off their registration fee. The extended abstract due date is 15 June 2017.

[Full details and an online abstract submission form](#) can be found on the Teledyne Marine website.
