

# Teledyne RD Instruments Awarded ISO 9001:2008

Teledyne RD Instruments have achieved the ISO 9001:2008 certification from Det Norske Veritas. This certification demonstrates Teledyne RD Instruments's™ commitment to quality for the design, manufacturing, and service of Acoustic Doppler Current Profilers (ADCPs) and Doppler Velocity Logs (DVLs) for the marine market.

ISO (International Organization of Standardization) is the source of the ISO 9000 and ISO 14000 families of quality and environmental management standards and some 15000 International Standards for business, government and society.
