

Teledyne Relaunches RDI University

Teledyne RD Instruments will host free online webinars for its customers via Teledyne RDI University. The first series of webinars will be focused on the company's navigation product line, offering 30-minute sessions focused on the many facets of the company's Doppler Velocity Logs (DVLs) for precision surface and subsea navigation applications.

Sessions range from basic system set-up to theory of operation, and are designed to aid customers in the use, maintenance, and optimisation of their DVL products. The first session is scheduled for 6 June 2013, with sessions running through to the end of the year. More [information and registration is available online](#).

The first initiative for the Teledyne RDI University was online in 2009.
