

# TES Survey Equipment Services to Resell Applanix

Applanix and TES Survey Equipment Services have entered into a partnership to provide products, support and service to marine clients in the Middle East. By working closely with TES, Applanix gains knowledgeable and experienced representation in the Middle East and TES further expands its solutions portfolio with the addition of Applanix' POS MV and POSpac MMS GNSS-aided inertial navigation products for the commercial market.

The [Applanix POS MV](#) system (Position and Orientation System for Marine Vessels) is a user-friendly turnkey system, designed and built to provide accurate position, heading, attitude, heave, and velocity data for marine vessels and remote sensing equipment. With over one thousand systems deployed worldwide, POS MV is field-tested, proven in extreme conditions. POSpac Mobile Mapping Suite is Applanix' software for Direct Georeferencing of mobile mapping sensors using GNSS and inertial technology.
