

Top to Bottom CO2 Measurements

CONTROS Systems & Solutions (Germany) develops and markets versatile subsea sensor systems for CO₂, methane and hydrocarbons measurements. The company is presenting a session on CO₂ measurements from subsea to the surface at Ocean Business on Wednesday 6th April from 13.30 to 14.30. On Tuesday 5th April, there will be a German Beer Festival on the stand, K8.

hydrocarbons is scheduled.

On Thursday 7th April, from 10.30 to 11.30, a session on advanced early leak detection for

CONTROS' sensors are used in many applications such as underwater hydrocarbon and gas measurements, greenhouse gas monitoring, ocean acidification, carbon capture and storage and also methane hydrate studies. Moreover CONTROS is involved in Subsea Oil & Gas Early Leak Detection and pipeline inspection. For information, please e-mail to contact@contros.eu or visit Stand K8 at Ocean Business.
