

Towed Coastal Monitoring Package

The MiniBAT Towed Coastal Monitoring Package (TCMP) is developed to address all coastal monitoring requirements in one easy to use system. The TCMP is based on the MiniBAT tow-body from OSIL and is fitted with YSI's 6600 Multiparameter Sonde (CTD, DO, pH, Chlorophyll, Turbidity).

Supplied fully integrated, complete with winch, cable terminations & GPS system etc., allowing rapid coastal surveys to be undertaken from small inshore work boats. The TCMP is designed for use by Harbour Authorities, Environment Agencies, Universities, Survey companies in line with the Water Framework Directive.
