

TrackLink 5000 USBL Systems

LinkQuest has released the TrackLink 5000 series of USBL tracking systems designed to work at the medium operating frequency of 17kHz. The working range of these systems is extended to 5,000 metres with high-power directional transponders and three models are ready for world-wide distribution. The TrackLink 5000LC system has a positioning accuracy of 3 degrees, TrackLink 5000MA is a medium accuracy system with a positioning accuracy of 1 degree and TrackLink 5000HA is a high accuracy system with a positioning accuracy of 0.25 degree. TrackLink 5000 systems also include integrated communication functions that share the same hardware and transducer with the USBL tracking system.
