

TrackLink Systems Reap Significant Worldwide Sales

LinkQuest's TrackLink USBL announces that Dr. Robert Ballard's Institute for Exploration has purchased a TrackLink 5000 system with 3 TN5010C transponders. This system has been used to track a ROV at water depth of up to 3900 meters in a recent expedition with exceptional results. Australia's CSIRO (Commonwealth Scientific and Industrial Research Organisation) has awarded LinkQuest a contract for a TrackLink 1500HA system with 4 transponders after open tendering. Hydro Quebec of Canada purchased another TrackLink 1500HA system for acoustic positioning in dam inspections. Lockheed Martin and NASA have recently awarded LinkQuest contracts to supply TrackLink systems for AUV tracking and navigation. Codevintec of Italy has purchased a TrackLink 1500MA system to include the system in its leasing pool. LinkQuest has also delivered 4 TrackLink systems to US Defense Intelligence Agency to track the LBV ROVs manufactured by SeaBotix of San Diego (CA, USA).
