

Training on Safety Strategies by Atlas Services Group

Independent hydrographic surveyor is to present a training session entitled 'Principles of inshore survey and the importance of survey strategy for safety and data quality'. The session is scheduled on Thursday 11 April 2013, from 12.00 to 13.00 in Node Room 064/03 of the NOC, Southampton, UK.

Agust Magnusson shares his broad experience and insights taken during his career and the session promises to be interesting for hydrographic surveyors who aim to keep up their knowledge.

Registration to attend the training is requested at Atlas Services Group, Booth W1 at Ocean Business.
