

Training Portal for Kongsberg Maritime

Kongsberg Maritime has launched its new global training website. The portal improves functionality for selection and booking of Kongsberg Maritime's training course portfolio, which is available at training centres in 11 countries. With the launch of the portal, Kongsberg Maritime's global training schedule is accessible to all visitors with a fresh design and easy navigation that allows courses to be booked in minutes.

Kongsberg Maritime's training portal provides information on course content, prerequisites and assessment information, as well as duration and cost. Courses can be searched by location or course category and dates can be viewed in list view, along with availability. Developed using contemporary design standards and tools, the streamlined new website is designed to be easily viewed on handheld devices, meaning courses can

be booked straight from desktop, tablet or mobile.

Kongsberg Maritime's training portal streamlines booking for more than 130 distinct training courses available worldwide in addition to vessel specific and customised courses. The company offers a varied course portfolio covering all aspects of automation, <u>dynamic positioning</u>, navigation, <u>reference systems</u> and <u>subsea survey</u> and crane operations. Type Specific and generic training includes courses recognised by DNV-GL, IMCA and the Nautical Institute.
