

UKHO at Sea Asia 2009

The United Kingdom Hydrographic Office (UKHO) will use the Sea Asia 2009 conference and exhibition to highlight safe, compliant and global electronic navigation - despite the downturn in world shipping markets. At a time when freight rates and asset values are under pressure, the UKHO is able to deliver increases in official electronic navigation chart (ENC) coverage to support ships wherever they trade.

In addition to being official sponsor of the Sea Asia 2009 Seminar Theatre, UKHO will be holding a daily seminar 'The Future of Navigation' to map out for Asian maritime executives its work towards the adoption of ECDIS, the practical application of ENCs and the implications of e-navigation.

UKHO's Guy Edwards will present the seminar from 1030 to 1100 on Tuesday 21st April, from 1410 to 1440 on 22nd April and from 1205-1235 on 23rd April 2009.
