

Underwater Modem Sales

EvoLogics has supplied underwater equipment and technical support to Offshore Manpower for the positioning, remote acoustic control and landing in the Atlantis Artificial Buoyant Seabed (ABS) unit trials.

The ABS unit was submerged, tied back to wellhead and BOP landed successfully April 2009, as part of the offshore phase trials on-board the vessel *Nan Hai 5* in China.

EvoLogics has provided the acoustic positioning and communication equipment and offshore technical assistance during the trials performed in conjunction with Atlantis Deepwater Oriented Limited (ADOL), China National Offshore Oil Corporation (CNOOC) and China Oilfield Services Limited (COSL).

EvoLogics GmbH is a high-tech enterprise specialized in the production of underwater acoustic communication and positioning equipment.

Offshore Manpower SA is a leading supplier of high quality personnel and equipment to the offshore industry, coupling experienced personnel with advanced technology, at one with clients in achieving all goals safely and effectively.
