

# Unique Group Signs Agreement with iXblue to Acquire Five DriX Units

Subsea and offshore solutions provider Unique Group has signed an agreement to acquire five Unmanned Surface Vessels (USV) DriX units from French company iXblue, marking an investment in the Group's global portfolio of survey products. With an aim to continually introduce latest cutting-edge technology for offshore survey operations, Unique Group's new addition is designed for a wide range of tasks such as geophysical and hydrographic surveys, touchdown monitoring of pipelines, subsea positioning, and ROV/AUV tracking. DriX, with its long endurance, increased hydrodynamics and flexible sensor payload, can significantly improve the efficiency of offshore operations and act as a true force multiplier in the marine renewables sector as well as subsea construction, IRM and decommissioning in the oil and gas markets, the company states.
