

Unique System Ensures Availability of NPCC Survey Equipment

Unique System FZE, UAE, has been awarded a 2-year service contract by the National Petroleum Construction Company (NPCC). The 2-year contact covers a wide range of equipment for hydrographic surveys, geophysical surveys, oceanographic surveys, observation-class ROVs and surface & underwater positioning to support NPCC projects in the Middle East and Southern Asia.

Established in April 1973, NPCC is a construction company providing clients total engineering, procurement and construction (EPC) services in the development of offshore and onshore Oil & Gas fields for the Arabian Gulf and the regional markets.

Over the years, Unique System FZE has been supporting the NPCC offshore operation with a wide range of survey equipment. Through a rental pool investment policy, Unique System ensures survey solutions are readily available to support varied survey applications at NPCC.
