

Unmanned Systems and Solutions for Argentina and Uruguay

Liquid Robotics has entered into a new channel partnership with Ingenieros Electrónicos Asociados (IEA), one of Argentina's trusted suppliers of oceanographic electronics and naval communications. This channel agreement enables IEA to sell, support, and service Liquid Robotics' Wave Gliders throughout Argentina and Uruguay.

Wave Gliders are wave powered ocean robots that collect and communicate real-time ocean data without the need for fuel, while performing long-duration missions.

Liquid Robotics continues expansion of their international presence and market growth through partnerships with industry leaders with technology, sales, and go-to-market local expertise. The distribution partners in South America currently include: Innervycs (Chile)

and CI2 (Colombia, Peru, Ecuador, Panama and Venezuela).
