

# Unmanned Systems Take Centre Stage in Next Issue of *Hydro International*™

Unmanned systems – subdivided into remotely operated underwater vehicles (ROVs), autonomous underwater vehicles (AUVs) and unmanned surface vehicles (USVs) – will be the key topic of the next issue of '*Hydro International*'. With in-depth articles, columns and Q&As, this edition will provide a complete overview of today's latest trends as well as future developments in autonomous underwater solutions.

If you are interested in contributing an article or sharing your news in this Unmanned Systems Special, please contact content manager Wim van Wegen ([wim.van.wegen@geomares.nl](mailto:wim.van.wegen@geomares.nl)). There are also attractive possibilities for advertising, both online and in print. Feel free to contact Thomas Stuiver ([thomas.stuiver@geomares.nl](mailto:thomas.stuiver@geomares.nl)) to learn more about highlighting your company

in this issue.
